[You For Mac Apps](#)

---

TunnelBear is one of the best VPN software for Mac as it doesn't log any activity of its customers and keep the privacy intact. The company has a solid range of app support, running on Mac, Windows, iOS, Android, FireTV and routers. You can also use TunnelBear against VPN blocking with Ghostbear feature as it makes your VPN data less prone to detection to ISPs, governments or others. Surf privately and securely with no limitations Protect your online privacy with lightning fast and stable connection. However, this is not the ultimate solution to protect your privacy, but just a part of it.

Mostly VPN services takes help of a desktop application that runs in background encrypting your data when browsing web. You can get secure access to Internet without being hacked or tracked It hides your IP address, physical location of VPN server.
